## Midterm Activity #5: Personal Expense Tracker

### *Source Code:*

```
package one;

import java.util.Scanner;

public class ExpenseTrackerCristobal{

    public static void showTitle(){
        System.out.println("===== PERSONAL EXPENSE TRACKER =====");
    }

    public static double computeTotal(double food, double transport, double other, double
entertainment){
        return food + transport + other + entertainment;
    }

    public static String checkBudget(double total, double budget){
        if(total > budget){
            return "No!! You have exceeded your budget!";
        }else if (total == budget) {
            return "You used exactly your budget. Ubos na";
        } else {
            return "Safe! You are within your budget.";
        }
    }

    public static void displayResult(double total, double budget, String status) {
        double remaining = budget - total;

        System.out.println("\n===== Expense Summary =====");
        System.out.println("Total Expenses: " + total);
        System.out.println("Budget: " + budget);
        System.out.println("Remaining Budget: " + remaining);
        System.out.println("Status: " + status);
    }

    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);

        showTitle();

        String name = "Jade";

        System.out.print("Enter food expense: ");
        double food = sc.nextDouble();
```

```
        System.out.print("Enter transportation expense: ");
        double transport = sc.nextDouble();

        System.out.print("Enter other expenses: ");
        double other = sc.nextDouble();

        System.out.print("Enter entertainment expense: ");
        double entertainment = sc.nextDouble();

        System.out.print("Enter your budget: ");
        double budget = sc.nextDouble();

        double total = computeTotal(food, transport, other, entertainment);
        String status = checkBudget(total, budget);

        System.out.println("\nHello, " + name + "! Here is your expense report:");
        displayResult(total, budget, status);

        sc.close();
    }
}
```

## ***Sample outputs:***

### 1. *For exact budget*

### 2. *For within the budget*

3. ***For exceeding your budget***
